

## ABOUT AFTERSKOOL

### India's Premier Education Augmentation Academy

Afterskool design and conduct holistic development programmes for students across India with the objective of preparing them for life's challenges. ISO Certified | Recognized by HRD Ministry, Govt. of India. By providing students the opportunity to experience learning avenues outside their educational curriculum, Afterskool helps them shape their outlook about life, success and happiness.

We have also been certified by international organizations and we are an ISO 9001:2008 certified company. The international certification ensures to our customers that Afterskool is focused on its commitment of continuous quality improvement within all levels of Holistic Development. It is a relevant differentiator that provides increased credibility in the training and certification done by them.

**The most important function of holistic education at any level is to develop the personality of the individual and the significance of his life to himself and to others.**

Holistic development in children is the overall development of children in all areas of development. These areas include the following; physical, emotional, intellectual, social, moral, cultural and spiritual. Through holistic education, children learn more than just simple academic subjects, they develop social skills, explore who they are and learn to respect the earth. Not to forget that in education, it is not enough to nurture the kids academically, thus we need to nurture and develop the other aspects of a child's development. A holistically nurtured child will definitely meet and may even go beyond his potential

We are constantly adding to our bouquet of courses and constantly upgrading existing coursewares. While the material for each of these courses is well researched and scientifically structured, our facilitators can offer slight variations in how they are conducted to suit your specific needs. Students are granted certificates at the end of these classes.

Students who attend our workshops have consistently shown more advanced cognitive and analytical skills than their peers and have been able to perform better in the years to come. Our course design team constantly monitors the performance of our programmes and follows changes in global trends to ensure our material is always current and at the cutting edge of learning systems.

By making our programmes easily accessible and highly affordable, we hope to make a huge impact on future generations of our nation.

## Benefits to School

### Benefit to the school

---

#### Credibility Benefits

Today the new age parents are on a look out for a holistic form of education from the schools. They would like their wards to attend schools that provide all round development. Introducing the Afterskool program will enhance the Credibility of the school & make it holistic in its training approach.

#### Evolution Benefits

We are in an era where all communication is carried out with technology. It becomes imperative that those students are exposed to the real world. Introduction of holistic development along with school curriculum is welcomed by the educationist as well as parents. Through our courses students are exposed to the outer world as per today's requirements and skill sets which make them stand apart from the students of rest of the schools.

#### Appreciation Benefits

Learning of life skills will keep your students ahead of times & make them sharper. This will help your student's to actively participate & succeed in various competitions organised across schools at various city,state, national & international level.Awards, prizes and appreciation will not only make your school proud but will also help the students succeed in various spheres of life.

#### Financial Benefits

Offering these programs to students will also result in generation of revenue for the school by providing additional learning opportunity for the students. Also quality education will surely draw more students to school in form of new admissions giving school additional revenue.

#### Technological Benefits

Afterskool relies on well trained researchers to craft each of the course based on the latest understanding of the specific domain. A constant interaction and knowledge sharing helps the school in training the existing teachers and staff with new developments in the field of Holistic development.

## Benefit to Students

### Benefit to the students

---

#### Educational Benefits

Our training program helps the child to enhance and groom their inner and outer self, which in turn brings a positive change in their life. The program helps them to grow and succeed in their career.

#### Communication Benefits

Children do not just have to study about other cultures and belief systems in a textbook. Because of computers and the Internet, our world is more closely connected than it has been in any other century. They can actually talk to people and find out firsthand through discussion boards, instant messaging and chat rooms. It is a great benefit for children to learn about other countries, their people and their cultural environment because it instills a sense of community.

#### Accessibility Benefits

With the goal of educating every child, holistic education promotes several strategies to address the question of how to teach and how people learn. First, the idea of holism advocates a transformative approach to learning. This encourages children to understand relationships and learning about relationships are keys to understanding ourselves, so the aspect of community is vital in this learning process.

#### Career Benefits

While students go through Afterskool course, they are taught strategies and leadership learning programs. The personality development theories assist them in setting and prioritizing goals apart from identifying mile stones. Through personality development programs students are taught to make realistic, obtainable and measurable goals.

#### Personal Benefits

Through this course, children have the potential to change their outlook on their abilities, confidence and self-esteem. A shy or withdrawn child opens up and can talk to others in a better way. Children with emotional problems or those who are not often around other children learn to have access to the outside world.
